EXPERIENCE

Frontend web developer

Yuki Projects

March 2024 – Present

- Developed an "Instagram-like" application using React, including key features such as JWT based user authentication, photo uploads, posts editing, profile editing
- Developed an admin dashboard with draggable elements (including tables) and more other features using React

PROJECTS

React Sneakers - deployed | *JavaScript, React.js, Express.js, MUI*

- Developed a full-stack web application using Express.js for the REST API, React.js for the frontend, and MongoDB with Mongoose for database management
- Implemented base JWT authentication for secure routes
- Implemented synchronization of user's cart if a non-logged in user has items in their cart and decides to log in
- Implemented different filtering and sorting techniques
